

INDEX.

A.

Abdomen, injury of, 349.
 Abscess, metastatic, 75.
 — hepatic, 503.
 Absorption, venous, 194.
 Aconite in rheumatism, 528.
 Air, its entrance into the jugular vein, 533.
 — its introduction into the veins, 264.
 Amnesia, 551.
 Amputation of the thigh, 532.
 Andrae's medical report, 464.
 Aneurism of aorta simulating phthisis, 223.
 Anus, imperforate, 251, 404, 531.
 — extensive sloughing, 353.
 Aorta, aneurism of, 223.
 — ossification of, 223.
 Apoplexy, serous, 222.
 Arsenic, twelve cases of poisoning by, 259.
 — antidote to, 537.
 Articular rheumatism, aconite in, 528.
 Asthma, 240.
 Asparagus, syrup of, 227.

B.

Barytes poisoning with, 539.
 Barton on yellow fever, 50.
 Bard's case of congenital morbid state of knee joint, 555.
 Beaumont's experiments, 251.
 Belladonna in strangulated hernia, 533.
 Bergeon's new mode of depressing cataract, 244.
 Berkshire medical institution, 569.
 Bigonia catalpa, 240.
 Biliary calculi, 519.
 Bielt's ointment for porrigo, 225.
 Bielt's treatment of herpes preputialis, 527.
 Blind on soot in cutaneous diseases, 239.
 Boussingault on miasmata, 544.
 Bowels, discharge of fatty matters from, 495.
 Boyer on phosphoric acid in croup, 210.
 Brain, cyst in, 211.
 — structure of, 471.
 Breschet and Roussel on the skin, 198.
 Brodie's case of tumours over the body, 529.
 Browne on vaccination, 399.
 Bunsen and Berthold's antidote to arsenic, 537.

C.

Calculi pulmonari, analysis of, 542.
 Calderini's method of preparing creosote, 541.
 Caldwell on physical education, 560.
 Calculi, biliary, 519.
 Calculus in the bladder, new mode of extracting, 247.
 Camus on nerves of the hand, 191.
 Cancer of stomach, 212.
 Carbutt's clinical lectures, 445.
 Carlile on the motions and sounds of the heart, 477.
 Carson's case of the effusion of blood into pericardium, 207.
 Cartilages not susceptible of inflammation, 222.

Carron du Villards on pruritus, 238.
 — swelled breasts, *ib.*
 — on soot in diseases of the eyes, 243.
 Cassanova on cholera, 158.
 Cataract, new mode of depressing, 244.
 Causade's case of imperforate anus, 251.
 Charlton on retained placenta, 113.
 Chassagnac on some points in the anatomy, &c. of the vertebral column, 190.
 Chitty's medical jurisprudence, 468.
 Chlorine inhalations, 238, 528.
 Chloride of lime and soda in some affections of the mouth in children, 240.
 Chloride of lime in itch, 240.
 Chomel on typhoid fever, 137.
 Cholera in New York, 256.
 — anatomical characters of, 545.
 Cholera morbus in Russia, &c. 181.
 — Cassanova on, 188.
 — West's case of, 518.
 Chorea, Ruzs on, 456.
 Clavicle, new splint for fractured, 115.
 Club foot, 247.
 Colchicum autumnale, in leucorrhœa, 527.
 Conradi's general therapeutics, 452.
 Constant on the use of the chloride in some affections of the mouth in children, 240.
 Corrosive sublimate in ophthalmia, 529.
 Cooper on dislocations, 123.
 Coxe on Harvey's claims as discoverer of the circulation, 153.
 Cranial bones, fissure of, 537.
 Cresson and Sanson's new pad for trusses, 252.
 Creosote, 539, 541.
 Croton oil, external use of, 240.
 Croup, phosphoric acid in, 240.
 Cruveilhier on insusceptibility of cartilages to inflammation, 222.
 Cyclopædia of Practical Medicine and Surgery, 157.
 Cyst in the brain, 211.

D.

Dallaway's treatment of polyp, 532.
 Dartmouth college, 559.
 Dauvergne's lotion for porrigo, 224.
 Davis's case of foreign body in the heart, 215.
 Death apparent for three weeks, 211.
 Delivery, premature, 536.
 — fissure of cranial bones after, 537.
 Dentatus, luxation of, 265.
 Deponget on corrosive sublimate in ophthalmia, 529.
 Diabetic urine, analysis of, 555.
 Diarrhœa, 244.
 Dickson on the vis medicatrix naturæ, 116.
 Digitalis purpurea, 225.
 Digestion, Prout on, 467.
 Dinamometer, its application in the reduction of luxations, 530.
 Dislocations, Cooper on, 123.
 — of the humerus, 252.
 Dislocation of dentatus, 265.
 Donne on the secretions, 203.
 Drake's case of amnesia, 551.

- Dunglison's elements of hygiene, 424.
 Duodenitis, 214.
 Dupuytren, 544.
 Dutrochet on the passage of glasses through fluids, 199.
 Dysentery, 221, 510.
 E.
 Ehrenburg on structure of the brain, 471.
 Elbow joint, wound of, 73.
 Electric currents in organized bodies, 203.
 Emerson on mortality of Philadelphia, 267.
 Emesis, salivation arrested by, 274.
 Endosmose of gases through water, 199.
 Evacuators, anal and urinary, suppressed during eleven years, 210.
 Eye on gun-shot wounds, 120.
 F.
 Fallopean tubes, inflammation of, 372.
 — diseased, 373.
 Fatty matters, discharge of, from bowels, 495.
 Fawcington's case of reunion of fracture of cervix femoris, 534.
 Femur, ununited fracture of, cured by seton, 533.
 Fistula lachrymalis, 529.
 Fontanelle's researches in legal medicine, 458.
 Foramen ovale, open in an adult, 223.
 Fosgate on nightmare, 80.
 Fracture ununited, 251.
 — tardy union, 345.
 — absorption of callus after union, 346, 347.
 — ununited, cured by seton, 533.
 — of femur with the capsule, 534.
 Frankell on belladonna in strangulated hernia, 535.
 Fris's case of wound of the heart, 532.
 Fungous hematomas, 532.
 G.
 Gall-bladder, distended, 506.
 Gastro-duodenitis, productive of jaundice, 487.
 — resembling yellow fever, 487.
 Geddings' ointment for hæmorrhoidal tumours, 266.
 Gendrin on sulphuric acid as a prophylactic against lead colic, 528.
 Geneva college, 559.
 Genitals, wound of, 123.
 Gerard's mode of reducing luxations of the humerus, 252.
 Gerdy on the influence of position on the circulation, 200.
 Gerhard on pneumonia of children, 87.
 —'s clinical reports, 321.
 Girardin and Gaynard on cholera, 181.
 Goddard's stomach pump, 262.
 Gonorrhæal orchitis, 222.
 Graefe's report of the Clinico-Chirurgi-
 cal and Ophthalmic Institute of Berlin, 172.
 Gravity, its influence on the circulation, 200.
 Griffith on jalap plant, 558.
 Gun-shot wounds, 120, 357.
 H.
 Hahnemann's Organon, 460.
 Hand, Camus on nerves of, 191.
 Hannay on treatment of sore nipples, 527.
 Harrison's cases in midwifery, 366.
 Harvey's claims as the discoverer of the circulation, 153.
 Havana, climate of, 550.
 Hays's case of varioloid after vaccination and after inoculation, 267.
 Hayward's Physiology, 463.
 Head, cases of injuries of, 64, 545.
 — trepanning in wounds of, &c. 173.
 Hearing, relation of the cranium to the organ of, 193.
 Heart, sounds of, 192, 477.
 — foreign body in, 205.
 — peculiar sound of, 224.
 — wound of, 532.
 — disease of, 259.
 Heim on revaccination, 508.
 Hæmorrhoidal tumours, ointment for, 266.
 Henry and Delondre on quinine, 253.
 Hepatic abscess, 503.
 Hepatitis, 498, 520, 525
 — its termination in gangrene, 505.
 — chronic, 507.
 Hermaphrodite, 191.
 Hernia, strangulated congenital, radical cure, 342.
 — femoral, 344.
 — cured by belladonna, 533.
 Herpes preputialis, 527.
 Herisson's spgmometer, 543.
 Heustis on incorporation of placenta with uterus, 106.
 Hohl on injections of cold water into the cord to promote the separation of the placenta, 252.
 Hoillemin's case of occlusion of vagina, 407.
 Homœopathic medicine, 254.
 Horner on anatomical characters of cholera, 545.
 Hospital on chloride of lime in itch, 240.
 Humerus, dislocation of, 354.
 Hydrocyanic ether, 254.
 Hygiene, elements of, 424.
 I.
 Icterus, 481.
 — infantum, 486.
 Ileum, inflammation of, 215, 228.
 — in children, 217.
 Inflammation, experiments on, 498.
 Inflation for cure of intussusception, 556.
 Intestines, diseases of large, 221.
 Intussusception, 556.
 Iron, hydro-oxide of, as an antidote to arsenic, 537.
 Itch insect, 510.
 J.
 Jackson's case of disease of the heart and larynx, 239.
 — analysis of diabetic wine, 555.
 Jaundice, 481.
 — yellow vision in, 484.
 — from gastro-duodenitis, 487.

- Jaundice from obstruction of the biliary ducts, 492.
 ——— spasmotic, 494.
 Jejunum, inflammation of, 214.
 Jonet on digitalis, 225.
 K.
 Keckley's new splint for fractured clavicle, 115.
 Kidney, rupture of, 359.
 Kiernan on liver, 412.
 Kirkbride's clinical reports, 64, 342.
 Knee joint, congenital morbid condition of, 555.
 Koch's experiments on inflammation, 498.
 L.
 Larynx disease, 289.
 Latour and Roziers on asparagus, 227.
 Laugier's operation for fistula lachrymalis, 529.
 Lee on cholera in New York, in 1854, 256.
 — on diseases of women, 409.
 Leeches, preservation of, 542.
 Lepra, 374.
 ——— vulgaris, 517.
 Leucorrhœa, 527.
 Lisfranc's operations for cancer of neck of uterus, 550.
 Lithotomy and lithotripsy in the same individual, 531.
 Lithotripsy, cases of, 13.
 ——— 534.
 Liver, rupture of, 559.
 ——— anatomy and physiology of, 442.
 Logan and Ogier's Operative Surgery, 179.
 Lombard on aconite in acute articular rheumatism, 528.
 Luchtmans on venous absorption, 194.
 Lungs, abscess of, after amputation, 75.
 Luxations, 530.
 M.
 Macartney on the structure and functions of the nervous system, 473.
 Magendie's experiments on sounds of the heart, 193.
 ——— report on the sphygmometer, 543.
 Maisonneuve's case of destruction of central substance of spinal marrow, 222.
 Marc-Moreau on seat of gonorrhœal orchitis, 222.
 Materia Medica, Schroff's, 170.
 M'Dowell's case of ununited fracture of femur, 533.
 Medical jurisprudence, Trubuchet's, 168.
 ——— Chitty's, 468.
 Medulla oblongata, situation of anterior cords of, in relation to occipital foramen, 191.
 Mercurial inunctions in paronychia, 239.
 ——— action, 517.
 Mesenteric disease, great heat of the body the sole symptom, 210.
 Miasmata, 544.
 M'Junkin's case of wound of the genitals, 125.
 Mojon on the relation of the cranium to the organ of hearing, 193.
 Montesano's case of suppression of urinary and anal evacuations during eleven years, 210.
 Morris's case of injury of head, 545.
 Mouth, affections of, in children, 240.
 Muller on *scèle cornutum*, 527.
 N.
 Nævus, cured with tartar emetic, 251.
 Nerves of the hand, 191.
 Nervous system, 475.
 Neuralgia, 239.
 Nightmare, tæsgate on, 80.
 Nipples, sore, 527.
 Noble, on connexion between the uterus and placenta, 476.
 Nelaton on communication of optic nerves, 191.
 O.
 Ogier and Logan's Compendium of Operative Surgery, 179.
 Ophthalmia, corrosive sublimate in, 529.
 Optic nerves, communication of, 191.
 Ovaritis puerperalis, 206.
 ——— 372.
 P.
 Pantaleo's new mode of extracting stone from the bladder, 247.
 Paraplegia, 210.
 Paronychia, 239.
 Paul's case of fungous hæmatodes, 552.
 Paxon's Anatomy, 274.
 Pelouze on hydrocyanic ether, 254.
 Pennock on lepra and psoriasis, 374.
 Pennsylvania, University of, 274.
 Pericardium, effusion of blood in, 207.
 Perrine on tapioca, 549.
 ——— climate, 550.
 Petruni's case of symphysectomy, 535.
 Philadelphia, mortality of, 267.
 Phlebitis following operation for varicose veins, 79.
 ——— puerperal, 552.
 Phosphoric acid in croup, 240.
 Phrenitis following injury of the head, 71.
 Physiology, Hayward's, 463.
 Physical education, 569.
 Placenta, its incorporation with the uterus, 106.
 ——— retained, 113, 370.
 ——— its connexion with the uterus, 476.
 ——— injection of cold water into the cord to promote separation of, 252.
 Pneumonia of children, 87.
 Poisoning with barytes, 559.
 Polypi, remedy for, 532.
 Porrigo favosa, 224, 225.
 Potassa, ferro-cyanate of, 562.
 Premature delivery, 536.
 Prout on Digestion, 467.
 Prunus lauro cerasus, 238.
 Pruritus, 238.
 Psoriasis, 374.
 Puberty and pregnancy in a girl ten years of age, 266.
 Puchelt's peculiar sound of the heart, 224.
 Puerperal convulsions, 567.
 Pulse, instrument for measuring, 543.
